Education

Bennett University, B.Tech in Computer Science Engineering (Specialization: Data Science)

- Aug 2022 – May 2026 | CGPA: 8.30/10.0

Sri Chaitanya Junior College, Intermediate (TSBIE)

- June 2020 – May 2022 | Percentage: 97.8% (978/1000)

Projects

Nagrik – Agentic AI for Civic Complaints (Gemini, Playwright, Expo, Supabase) GitHub

- Built a **6-agent pipeline** that classifies a photographed civic issue (**Gemini vision**), finds the right office, drafts a complaint and files it on the portal via **Playwright**.
- Added a **monitoring & escalation agent** for unresolved complaints; supports **3 languages** (English, Telugu, Hindi) and voice.
- Ran agents as **tool-calling loops** with safety rules inside tools and **every tool call logged** for audit.

NutriSnap – AI Calorie & Macro Tracker (Gemini, Next.js, Expo, Supabase) GitHub

- Built a Cal AI–style tracker where **Gemini vision** identifies a meal from a photo and logs **7 nutrients** against a personal target.
- Shipped **web (Next.js 15)** and **mobile (Expo)** apps on one **Fastify + TypeScript API** and a shared calorie engine with **70 unit tests**.
- Secured data with **Supabase Row Level Security** on every table; automated checks with **GitHub Actions** CI.

Journi – AI Travel Planner (Gemini, Expo, Express, Render) GitHub

- Drafts **day-by-day itineraries** from **4 live data sources** (weather, currency, places, photos) with budgets in **INR**, refined by chat.
- Engineered a **Gemini** backend with **strict JSON**, self-correcting retries and model fallback on an **Express + zod** API.
- Built an **Expo** app with group trips, Google sign-in and **Supabase + RLS**; all API keys stay server-side.

Certifications

- **Data Analytics Job Simulation** – Deloitte Australia (Forage), Aug 2025; built an interactive **Tableau** dashboard.
- **Google Data Analytics Professional Certificate** – Google (Coursera).
- **Sequences, Time Series and Prediction** – DeepLearning.AI (2024) · **Exploratory Data Analysis for ML** – IBM (2024) · **Object-Oriented C++** – Codio (2025).

Skills

Languages: Python, TypeScript, JavaScript, SQL, C++, Kotlin.

Generative & Agentic AI: LLMs, RAG, Agentic AI, Multi-Agent Systems, LangGraph, LangChain, MCP (Model Context Protocol), Prompt Engineering, Embeddings, Vector Databases (FAISS), Hugging Face, Gemini / Claude / OpenAI / Groq APIs, Computer Vision, MediaPipe.

ML & Data: Scikit-learn, TensorFlow, PyTorch, NumPy, Pandas, PySpark, Matplotlib, Seaborn, Power BI, Tableau, EDA, Time Series Analysis, Deep Learning, NLP.

Web, Mobile & Backend: FastAPI, Flask, Node.js, Express, Fastify, Next.js, React Native (Expo), Streamlit, REST APIs, WebSockets, Pydantic, zod, Playwright.

Cloud, Databases & DevOps: Supabase, PostgreSQL, Row Level Security, Vercel, Render, Docker, AWS (EC2, S3, IAM), Git, GitHub, GitHub Actions (CI/CD).

Core Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Backend Development.

Achievements

- Built **10+ full-stack AI apps** (agentic, RAG, vision, voice), several live on **Vercel** and **Render**.
- Secured **3rd place** in a college-level Hackathon (2024); participated in **Smart India Hackathon (SIH)**.
- Released **Handsoff v1.0** Android app (public APK) for offline, gesture-based photo transfer between phones.
- Solved **200+** DSA problems across LeetCode, HackerRank and GeeksforGeeks.
